

SUMMARY OF PROPOSED COMMITTEE DRAFT:

**RESOLUTION 20-226
GRANTING A SPECIAL MANAGEMENT AREA USE PERMIT TO REPLACE
THE HANO HANO HALE APARTMENT BUILDING'S
EXISTING WASTEWATER TREATMENT SYSTEM.**

THE PROPOSED CD1 makes the following amendments:

- A. Revises the first WHEREAS clause and adds a second WHEREAS clause to clarify the description of the proposed Project.
- B. In the fifth WHEREAS clause, adds September 1, 2020, as the date the Council received the DPP's findings and recommendation by Departmental Communication 594 (2020).
- C. In Condition A, deletes the requirement that the Project consist of an underground wastewater system (instead of an aboveground system), and provides that construction must be in general conformity with the Project, as recommended by the DPP in the DPP's findings and recommendation, and as depicted in Exhibits A through F, except to comply with Condition B.
- D. Adds a new Condition B to require relocation of the Project to an alternative site between the Hanohano Hale apartment building and Kamehameha Highway. Realphabetizes subsequent conditions.
- E. In realphabetized Condition E, requires the Applicant to implement any remedial measures recommended by the State Division of Aquatic Resources (in response to any leaks or spills of wastewater during Project construction).
- F. Adds a new realphabetized Condition F.4 to include a standard condition regarding protection of the Hawaiian hoary bat's habitat.
- G. Adds a new Condition G to provide that prior to submittal of any development permit application for the Project, the Applicant is required to submit to the DPP for review and approval a landscape plan that mitigates visual impacts of the aboveground components of the Project. Realphabetizes subsequent conditions.
- H. Adds a new Condition I to include a standard condition requiring that the Applicant obtain a development permit within two years after SMP approval, and the process for extending this deadline.
- I. Makes miscellaneous technical and nonsubstantive amendments.

RESOLUTION

GRANTING A SPECIAL MANAGEMENT AREA USE PERMIT TO REPLACE THE HANOHANO HALE APARTMENT BUILDING'S EXISTING WASTEWATER TREATMENT SYSTEM.

WHEREAS, on May 22, 2020, the Department of Planning and Permitting ("DPP") accepted an application (DPP Reference Number 2020/SMA-19) from the Hanohano Hale Association of Apartment Owners (the "Applicant") for a Special Management Area ("SMA") Use Permit to replace the existing wastewater treatment system at Hanohano Hale, a 132-unit apartment building in Hauula, on approximately 0.5 acres of land zoned A-2 Medium Density Apartment District, located at 53-549 Kamehameha Highway, and identified as a portion of Tax Map Key 5-3-008:001 (the "Project"); and

WHEREAS, as proposed, the Project is a primarily aboveground wastewater treatment system that will include sewer piping, a secondary treatment unit, two blowers with a blower control panel, a 480-volt transformer, a diesel backup generator, fencing or screening walls, an underground preloader system, and four underground injection wells; and

WHEREAS, on July 13, 2020, the DPP held a public hearing, which was attended by the Applicant's agent, DPP and Department of Information Technology staff members, and nine members of the public (one attending in person and eight attending virtually by telephone or videoconference); no members of the public testified at the hearing; and

WHEREAS, on August 20, 2020, within 35 working days after the close of the public hearing (the Applicant having agreed to an extension of the 20-working day administrative deadline), the DPP, having duly considered all evidence and the objectives, policies, and guidelines as established in Sections 25-3.1 and 25-3.2 of the Revised Ordinances of Honolulu 1990 ("ROH"), and Sections 205A-2 and 205A-26 of the Hawaii Revised Statutes ("HRS"), completed its report and transmitted its findings and recommendation of approval to the City Council; and

WHEREAS, the City Council, having received the findings and recommendation of the DPP on September 1, 2020, by Departmental Communication 594 (2020), and having duly considered all of the findings and reports on the matter, desires to approve the subject application for an SMA Use Permit with the conditions enumerated below; now, therefore,

CITY COUNCIL

CITY AND COUNTY OF HONOLULU
HONOLULU, HAWAII

No. 20-226, CD1

RESOLUTION

BE IT RESOLVED by the Council of the City and County of Honolulu that an SMA Use Permit be issued to the Applicant for the Project, subject to the following conditions:

- A. Construction must be in general conformity with the Project as recommended by the DPP in the DPP's findings and recommendation referenced above, and as depicted in Exhibits A through F, attached hereto and incorporated herein by this reference, except to comply with Condition B. Any change in the size or nature of the Project that has a significant effect on coastal resources addressed in ROH Chapter 25 or HRS Chapter 205A, or both, will require a new application and SMA Use Permit. Any change that does not have a significant effect on coastal resources will be considered a minor modification and is therefore permitted under this resolution, upon review and approval by the DPP Director.
- B. To reduce the obstruction of ocean views from Kamehameha Highway, the aboveground components of the Project must be relocated to an alternative site between the Hanohano Hale apartment building and Kamehameha Highway, which will necessitate the removal or relocation of the access path, emergency generator, electrical transformer, utility lines, trash enclosure, portable toilet, and trees currently existing on the alternative site.
- C. Prior to any ground disturbance, the Applicant shall provide the DPP with written confirmation of the Department of Land and Natural Resources, State Historic Preservation Division's ("SHPD") acceptance and approval of an archaeological inventory survey for the Project site.
- D. If, during construction, any previously unidentified archaeological sites or remains (such as artifacts, shell, bone, or charcoal deposits, human burials, rock or coral alignments, pavings, or walls) are encountered, the Applicant shall stop work, protect the find from further disturbance, and contact SHPD immediately. Work in the immediate area must be stopped until the SHPD is able to assess the impact and make further recommendations for mitigative activity.
- E. Any leaks or spills of wastewater during Project construction must be immediately reported to the State Division of Aquatic Resources ("DAR") for DAR's assessment of the impact of the leak or spill to the freshwater and marine habitats. The Applicant shall implement any remedial measures recommended by the DAR.

RESOLUTION

F. To minimize impacts to threatened, endangered, or protected fauna known to frequent or transit through the Project site, the Applicant shall be responsible for the following:

1. Artificial light from exterior light fixtures, including but not limited to floodlights, uplights, or spotlights used for decorative or aesthetic purposes, is prohibited if the light directly illuminates or is directed to project across property boundaries toward the shoreline and ocean waters, except as may otherwise be permitted pursuant to HRS Section 205A-71(b).

Exterior light fixtures must be fully shielded with the light directed downward so that the light bulb is only visible from below the light fixture. Outdoor lighting must be turned off when human activity is not occurring in the illuminated area.

2. Nighttime work (from sunset to sunrise) must be avoided during the seabird fledgling season from September 15 through December 15.
3. The DPP and all private contractors must be notified of any observations of threatened, endangered, or protected fauna on the Project site during preparation and construction. If any threatened, endangered, or protected fauna are observed, the Applicant shall implement applicable mitigative measures.
4. To protect the Hawaiian hoary bat's habitat, the Applicant shall take special care when trimming, relocating, or removing trees on the Project site. Woody plants greater than 15 feet in height must not be disturbed, trimmed, or removed during the Hawaiian hoary bat birthing and pup rearing season from June 1 through September 15.

G. Prior to submitting any development permit application for the Project, the Applicant shall submit to the DPP for review and approval a landscape plan that mitigates visual impacts of the aboveground components of the Project.

H. Approval of this SMA Use Permit does not constitute compliance with Land Use Ordinance ("LUO") or other governmental requirements, including but not limited to building, grading, and grubbing permit approvals. They are subject to separate review and approval. The Applicant will be responsible for ensuring that the final plans for the Project approved under this SMA Use Permit comply with all applicable LUO and other governmental provisions and requirements.

CITY AND COUNTY OF HONOLULU
HONOLULU, HAWAII

No. 20-226, CD1

RESOLUTION

- I. The Applicant shall obtain a development permit for the Project within two years after approval of this SMA Use Permit. Failure to obtain a development permit within this period will render this SMA Use Permit null and void; provided that this period may be extended as follows: the DPP Director may extend this period if the Applicant demonstrates good cause, but the period must not be extended beyond one year from the initial deadline set by the City Council.

If the Applicant demonstrates good cause for an extension exceeding one year, the Director shall prepare and submit to the Council a report on the proposed extension, which report must include the Director's findings and recommendation thereon. The Council may approve the proposed extension or an extension for a shorter or longer period, or deny the proposed extension, by adoption of a committee report or resolution.

If the Council fails to take final action on the proposed extension within the first occur of: (1) 60 days after receipt of the Director's report; or (2) the Applicant's then-existing deadline for obtaining a development permit, the extension will be deemed denied.
